

Lashing Assemblies

Polystrop manufacture a huge range of heavy, medium and light duty lashing assemblies. A variety of systems are available for retaining heavy loads on vehicles and trailers, for internal cargo restraint to secure loads within box vans, for vehicle recovery applications and car transporter use.

Our light duty lashing assemblies have numerous hobby applications.

Quality assured, Polystrop lashing equipment complies with current standards and is manufactured under our ISO9002 quality system.

Below are details of some popular systems. Details of our full range and the many different combinations of buckles, webbing and fittings can be discussed with our sales team.
