

RGL19 Adjustable Twin Leg Restraint Lanyard

RGL19

Accredited To:EN 354

Web Material:25mm Polyester 40Kn

Weight: 0.4 kgs

Features: Twin Leg Webbing adjustable Restraint Lanyard

Max Arrest Force: **Restraint Only**

The RGL19 is supplied in two standard lengths: **0.9 – 1.3 Mtr**
1.2 – 1.8 Mtr

The RGL19 is a twin leg adjustable restraint lanyard and is industry standard, and normally the minimum equipment issued with a harness for working at height. The 40kN webbing used in the manufacture provides greater strength compared to other webbing and systems. The additional benefit of adjustability allow for greater flexibility. The lanyard length can be adjusted to suit the application.

It is important to understand the principles of “fall restraint” as the RGL19 can only be used for **Fall Restraint**, as there is no shock absorbsion built into the system. If there is **any** possibility of an operative stepping/falling over an exposed edge, or falling through a fragile surface, a **Fall Arrest** product should be used.

This lanyard can be fitted with any compatible EN362 Karabiner

(For details of daily inspection procedures, see the info sheet)
