

RGL2 Kernmantel Lanyard

RGL2

Accredited To: En354 & EN355

Material: 12mm Kern mantle Rope

Fittings: Any Compatible EN362

Karabiners

Weight: 0.4kg

Features: Fitted with shock absorber pack.

Max Fall Arrest Force: < 6KN

The RGL2 is supplied in two lengths:

1.3 M

1.8 M

The RGL2 lanyard is of “traditional” type, using 12mm Kernmantle Rope which has machine stitched connection eyes at each end. The lanyard is fitted with a standard shock absorber pack, even though the rope itself has some shock absorbing capacity. The rope used in the manufacture of this lanyard, shows some resistance to alkalis, oils and organic solvents.

This lanyard should be used when the operative is working from a static position, connected to a fixed anchor point. If movement between anchorages is required, a twin leg lanyard should be used (RGL3), to provide constant protection.

Can be fitted with many different types of Karabiners.

(For details of daily inspection procedures, see the info sheet)
