

## RGA5 5m Fall Arrest Block

**Accredited To:** EN 360

**Web Material:** 28mm Multi panel polyester  
MBS 2350kgs

**Connectors:** Double action High tensile  
steel alloy

**Weight:** 2kgs

**Features:** Rip stitch indicator

**Max Fall Arrest Load** <6KN

The RGA5 is a compact, robust yet lightweight fall arrest block. This unit does not have an integral handle, but is fitted with an alloy swivel eye for connection to an anchorage via a karabiner. Due to its low weight, this device is ideal for use with certain horizontal lifelines.

As a general-purpose fall arrest block, the RGA5 has proved it's worth in the industry. Fitted with webbing instead of wire, this block is suited for work in and around fragile components i.e.; aircraft industry and glass lined vessels.

The RGA5 has a working length of: **5 metres (New Length Jan 09)**

**( For details of daily inspection procedures, see the info sheet)**
